ANALYSIS OF LEGAL CASES DATASET

Subtitle: A Comprehensive Overview of Case Data
Date: 05.12.2024
Presenter's Name: Kishor sil

Dataset Overview

- **Total Number of Cases:** 100

- **Key Attributes:**
  - Case ID
  - Case Type
  - Lawyer Name
  - Court Jurisdiction
  - Case Status
  - Legal Fees
  - Duration (in days)

- **Visual Aid:**

- A table or bar chart showing the distribution of case types or jurisdictions.

Case Type & Status Distribution

- **Case Type:** Breakdown of the most common case types (e.g., civil, criminal, family, etc.)

- **Case Status:** Distribution of ongoing, resolved, or pending cases

- **Visual Aid:**

- Pie charts or bar charts to show the proportion of each case type and case status.

- For example: A pie chart showing percentages of case types (e.g., civil, criminal, etc.) and another pie chart for case statuses (e.g., closed, pending, active).

Legal Fees & Case Duration Analysis

- **Legal Fees:** Overview of the range of legal fees (e.g., minimum, average, maximum fees)

- **Duration:** Average duration of cases, potential trends in case duration based on case type or status

- **Visual Aid:**

- Bar chart comparing legal fees by case type.

- Box plot or histogram showing the distribution of case durations.

Lawyer Performance & Outcomes

- **Lawyer Performance:** Distribution of cases handled by different lawyers.

- **Case Outcome by Lawyer:** Number of successful vs. unsuccessful cases for each lawyer (if case outcome data is available).

- **Visual Aid:**

- A bar chart showing the number of cases per lawyer.

- A success rate comparison (cases won vs cases lost) for each lawyer, if applicable.

End Of The Project

- Thank You
